📢 **Important Announcement – GitHub Training Session**

Dear Students,

We are organizing a **special 1-hour online training session on GitHub** exclusively for you.

Session Objective

By the end of this session, you will:

- Understand Git & GitHub from basics to advanced use.

- Create your own **digital portfolio repository**.

- Learn how to manage projects, upload code, and build a professional profile.

- Set up **GitHub Pages** to showcase your resume and projects online.

Post-Session Requirement

- Each student must complete a **worksheet** (to be shared after the session).

- The worksheet will include practical steps such as creating a repo, adding README, uploading files, and enabling GitHub Pages.

- **Evaluation** will be based on successful completion and submission of your GitHub profile link + repository.

Next Steps

After the initial session, there will be a **follow-up review session** where the trainer will go through each student's submission and provide feedback.

⚡ **Why is this important?**
This exercise will help you **kickstart your professional online portfolio** – a must-have for internships, placements, and showcasing your skills to recruiters.

⏰ **Date & Time:** Oct 04, 2025 – 12PM to 1PM
📍 **Mode:** Online, Link: http://meet.google.com/gjk-acou-qxx

All students are requested to **attend without fail** and actively participate.

GitHub Training Session - Worksheet & Grading

After the session, each student must complete a practical **GitHub Worksheet** (details will be shared after the session).
